

Task 3: Jira Board Setup, User Stories and Story Points

Atharva Jain(2420030092)

Aim: To create a Scrum project in Jira, define five user stories, assign story points, create a sprint, and manage work using a Scrum Board.

Step 1: Create a Jira Account

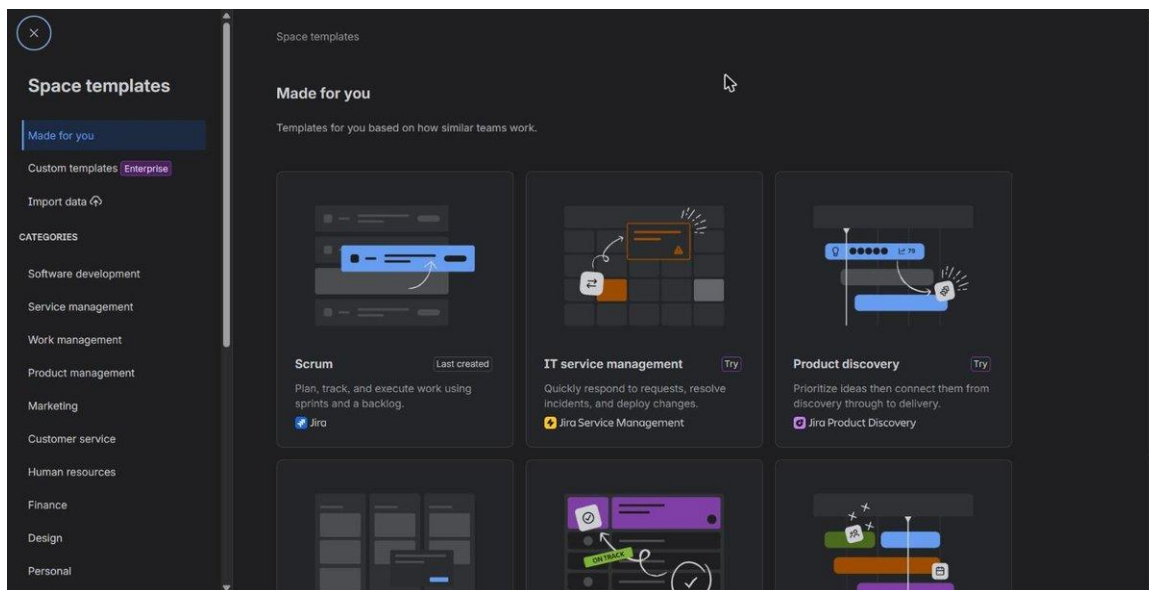

1. Go to <https://www.atlassian.com/software/jira>
2. Click Get it Free or Sign Up.
3. Create an Atlassian account and verify your email (Domain Mail Id Only).
4. Log in to Jira.

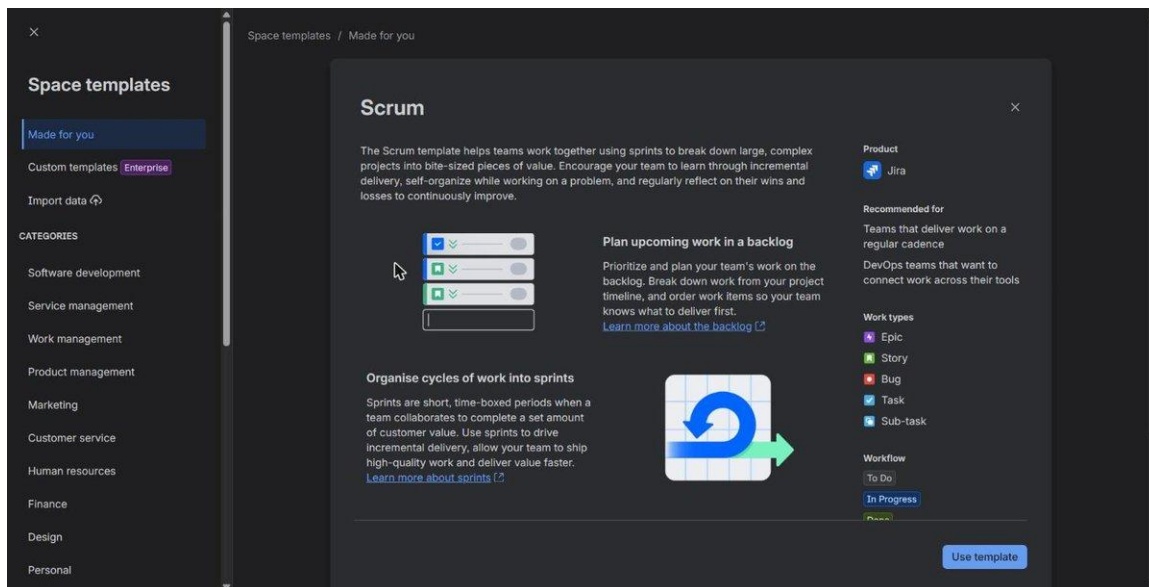

(This step was completed directly by the user for account security purposes.)

Step 2: Create a Scrum Project

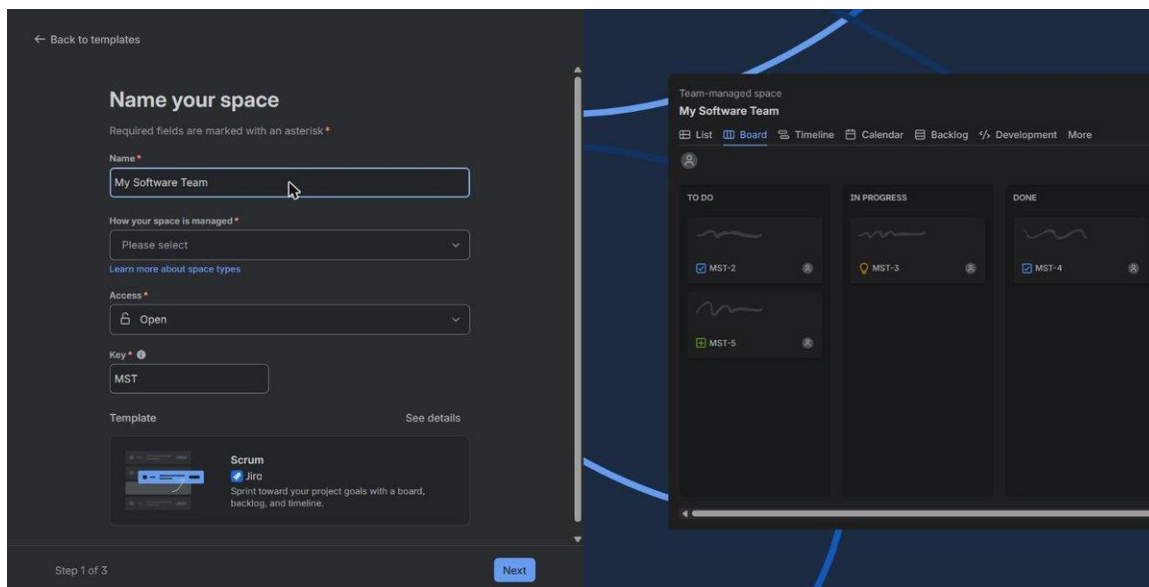

Create a Software project using the Scrum template. Give the project a name such as 'My Software Team'.

Selecting the Scrum template

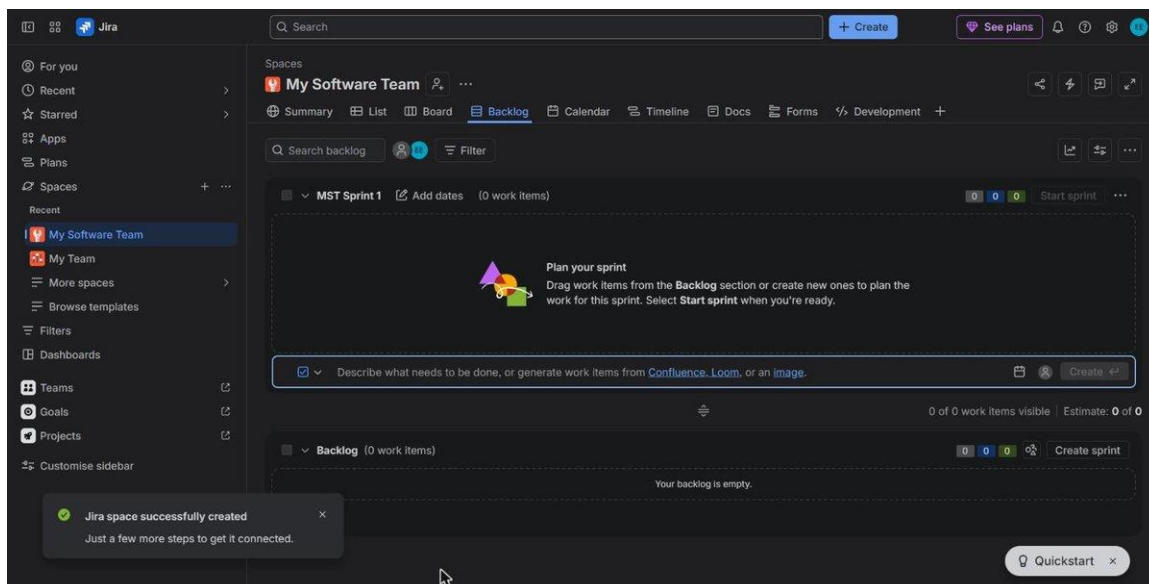

Naming the project

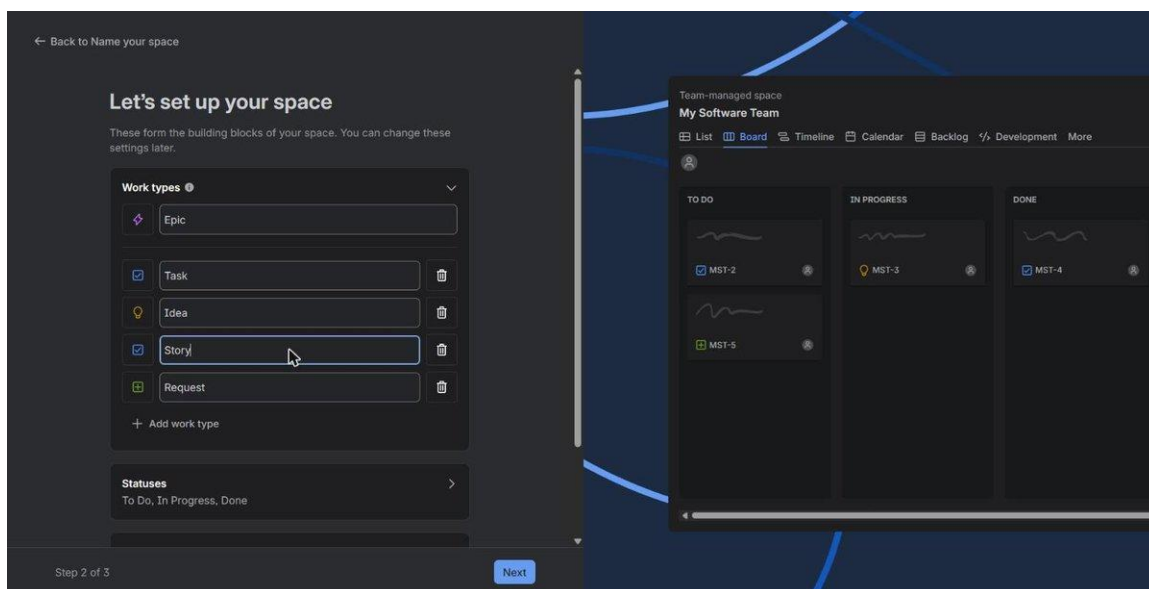

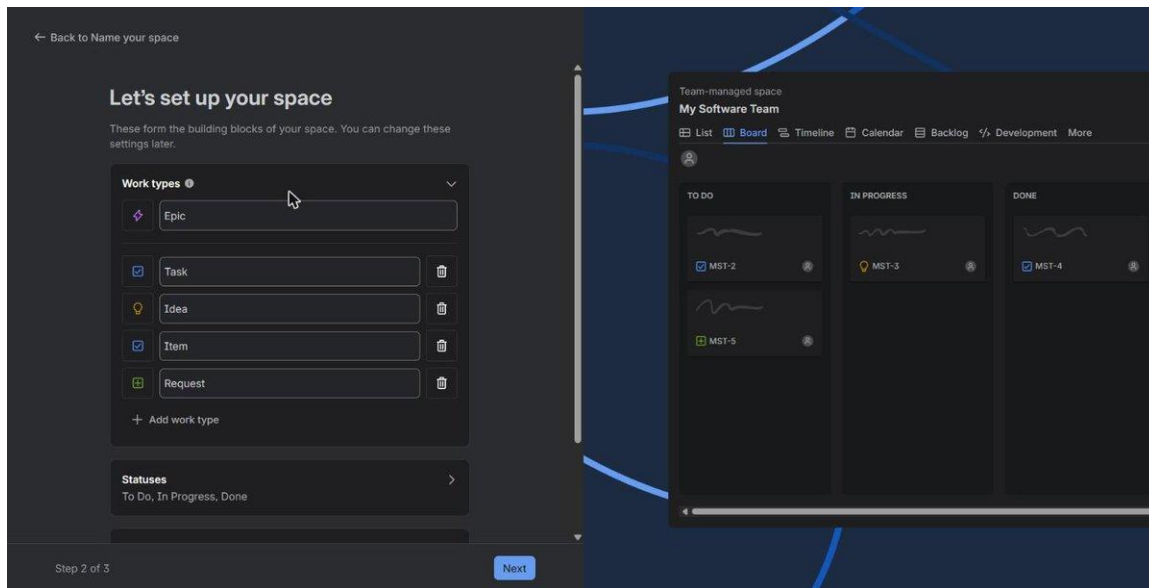

Result: Project created

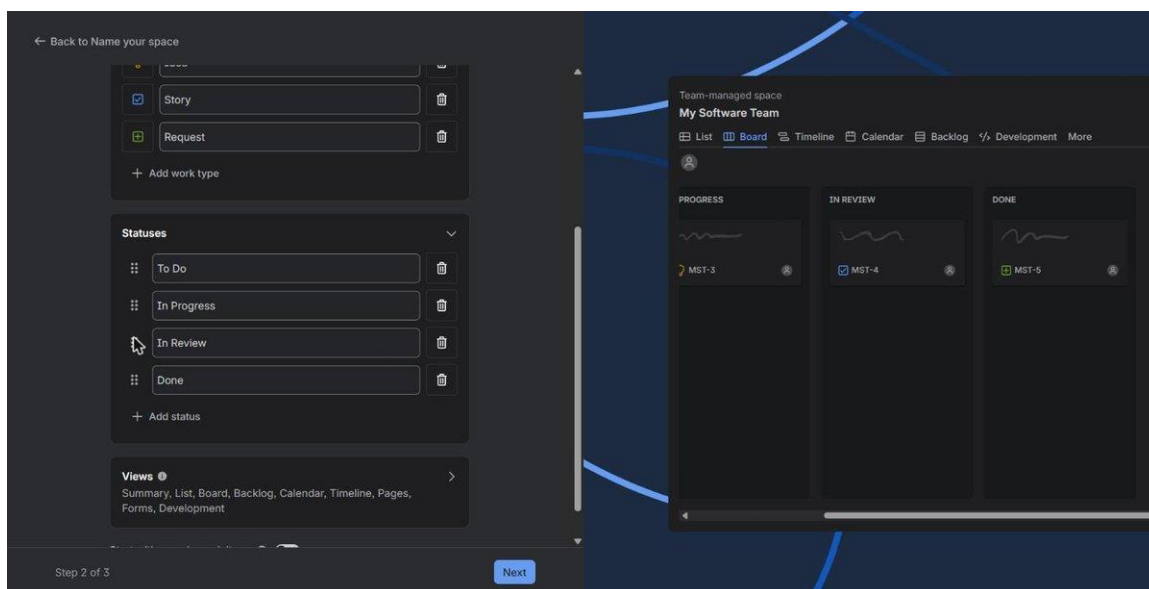

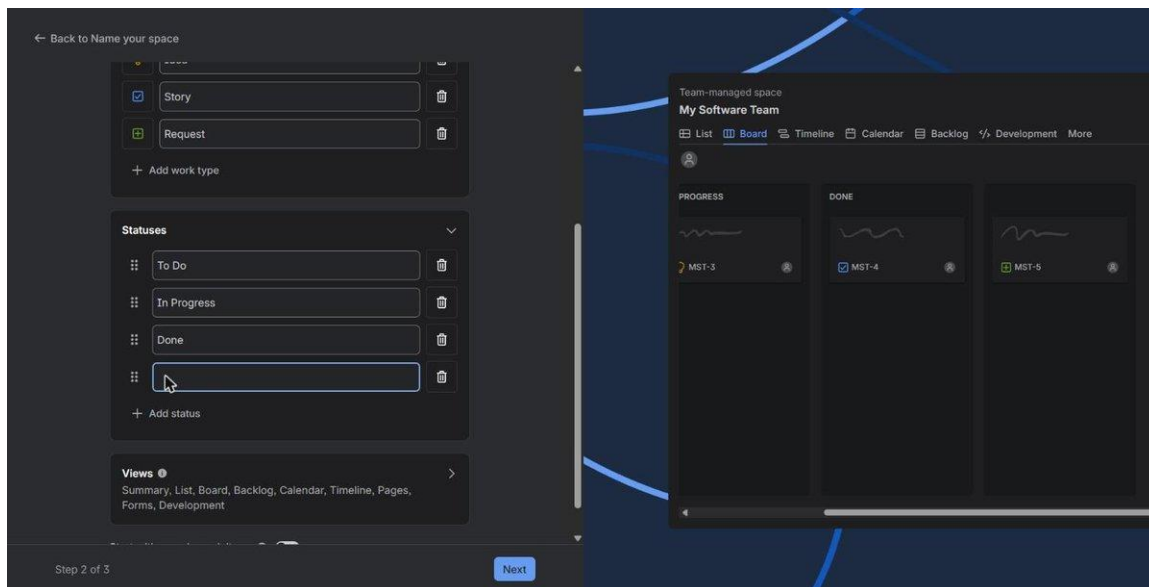

Step 3: Select Work Types

Select Story and Task as work types. Stories represent user requirements.

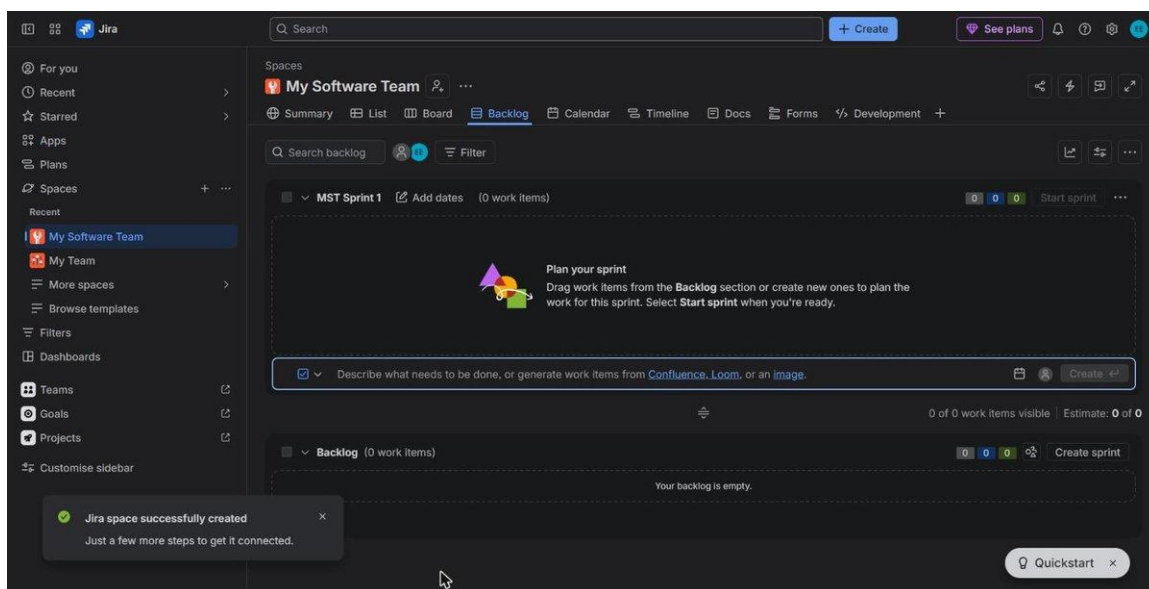

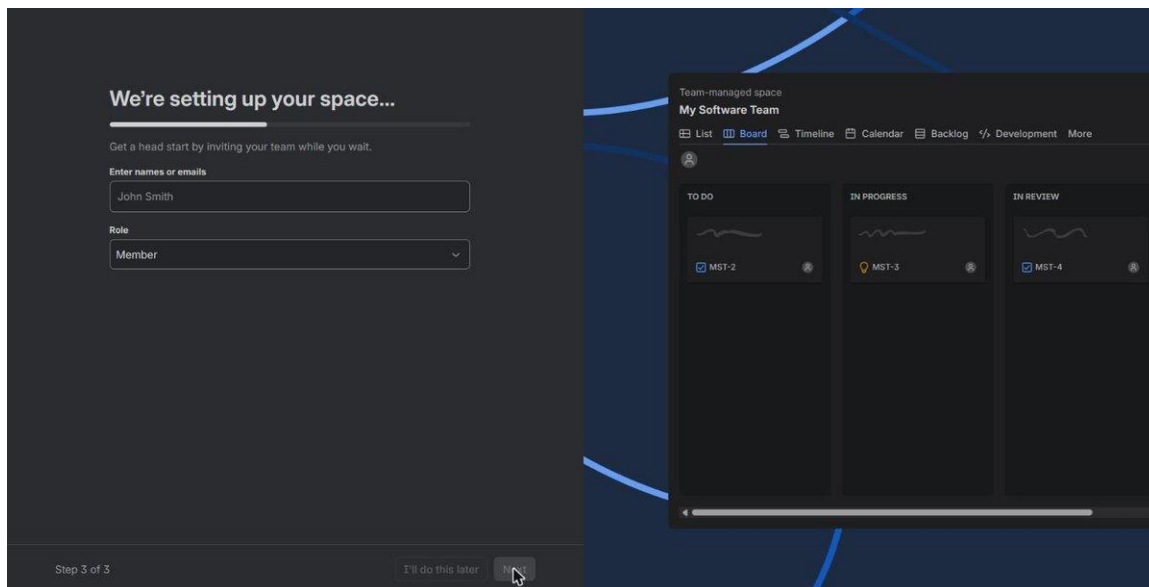

Step 4: Configure Workflow

Keep the default workflow: To Do → In Progress → In Review → Done.

Step 5: Skip Team Invitation

Skip inviting teammates and proceed to Jira.

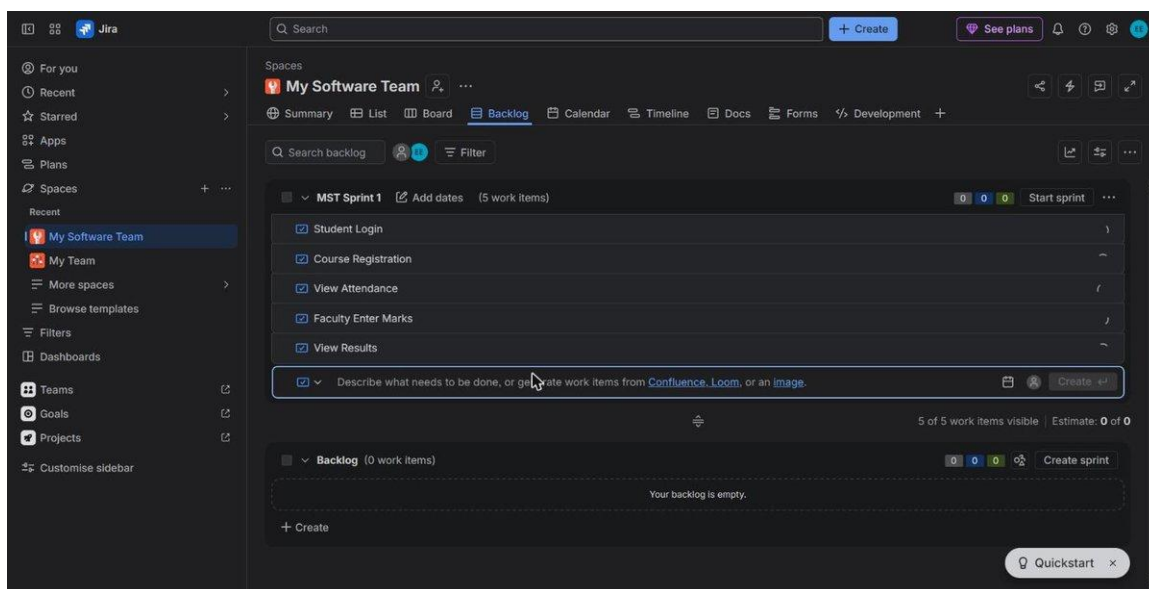

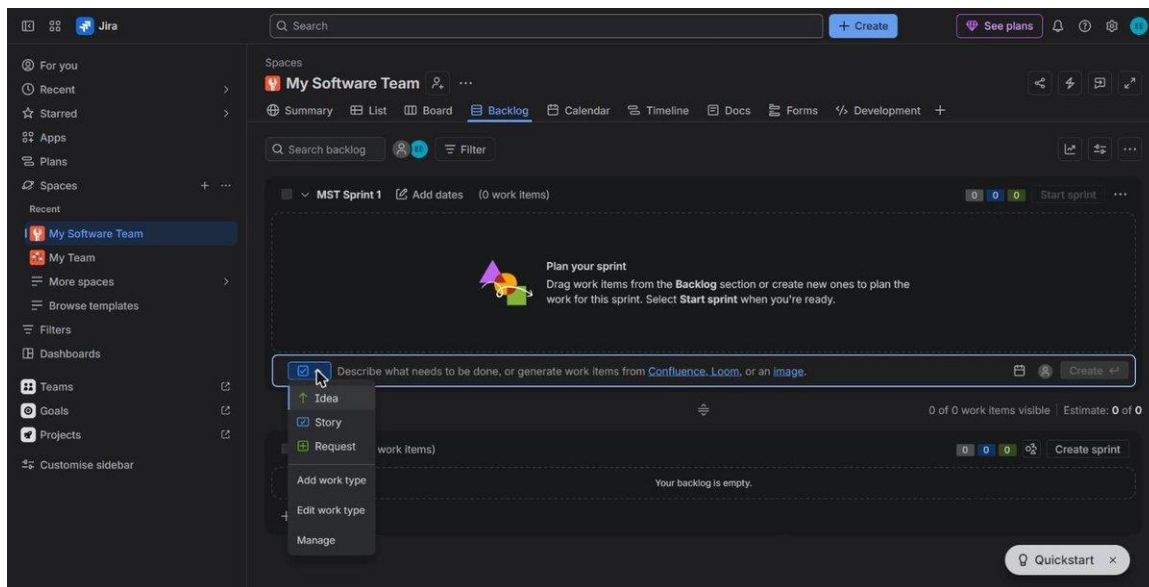

Step 6: Create User Stories

Create five stories:

- Student Login
- Course Registration
- View Attendance
- Faculty Enter Marks
- View Results

After clicking "Go to Jira" you should see your project dashboard. Go to Backlog from the left navigation menu, then click Create (top menu or in the backlog) to add each story.

Step 7: Assign Story Points

Assign story points using Fibonacci estimates:

Summary	Story Points
Student Login	3
Course Registration	5
View Attendance	2
Faculty Enter Marks	5
View Results	3

Story 1 — Student Login

Summary: Student Login

Description:

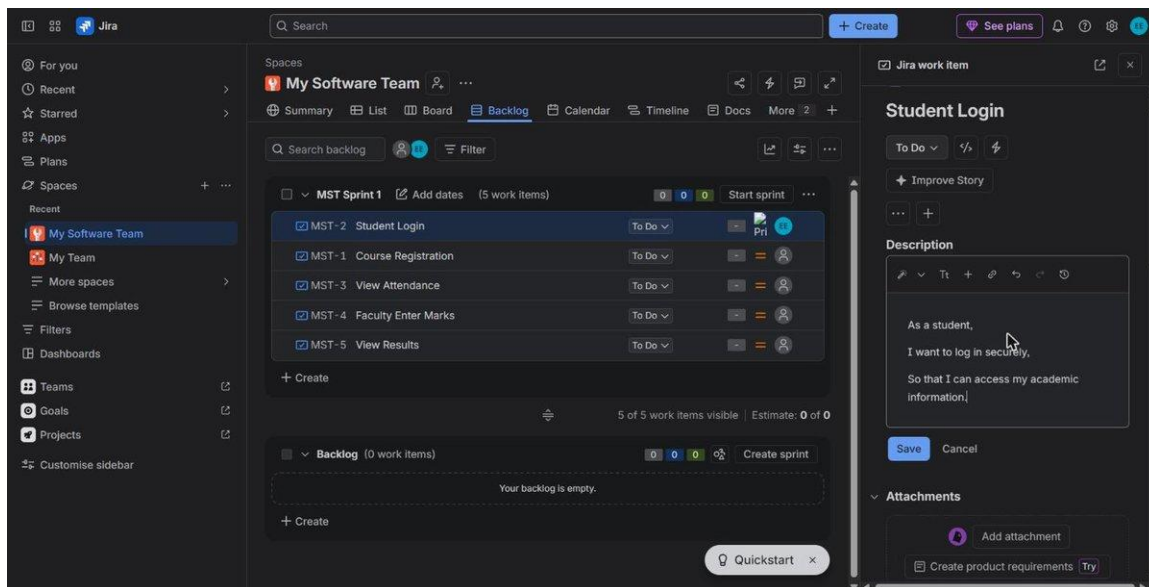

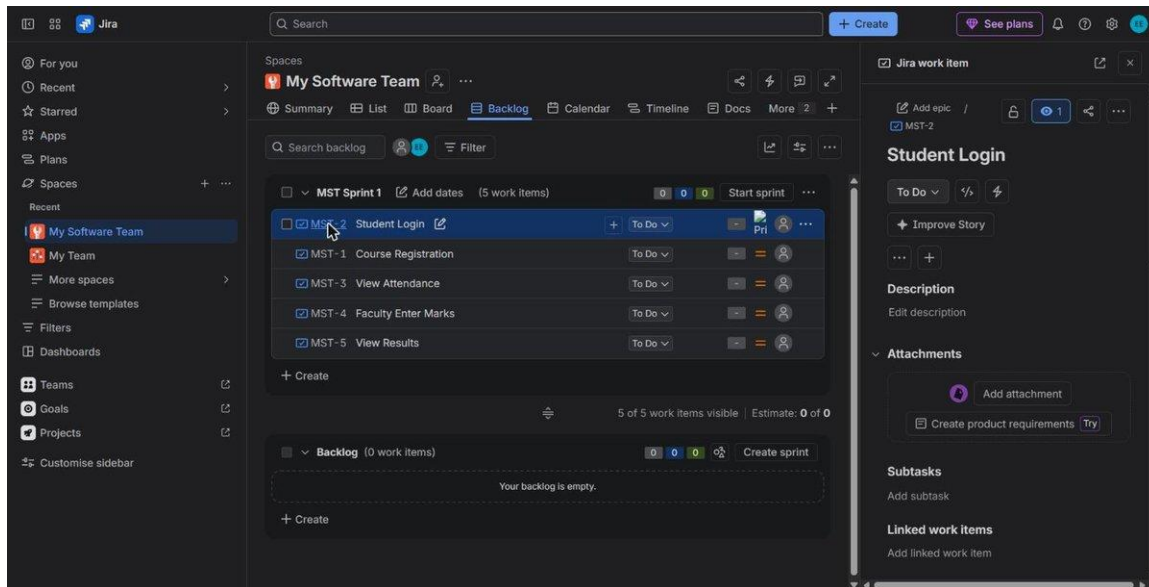

As a student,
I want to log in securely,
So that I can access my academic information.

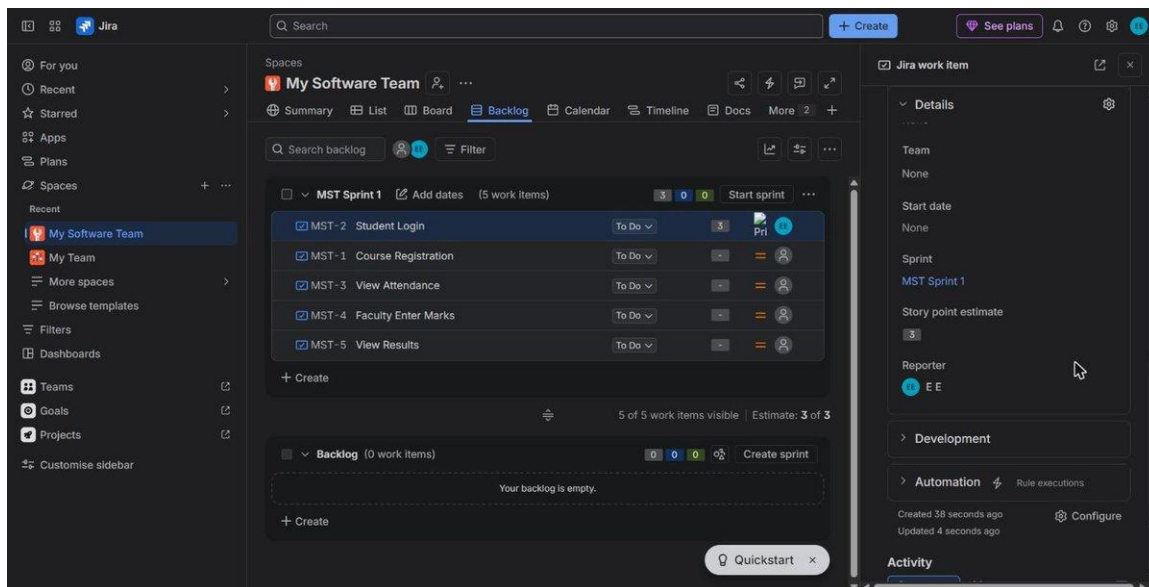

Status: To Do (left as default)

Story Point Estimate: 3

Priority: Medium (default)

Reporter: Default

Story 2 — Course Registration

Summary: Course Registration

Description:

As a student,
I want to register for courses,
So that I can enroll in my subjects.

Story Points: 5

Story 3 — View Attendance

Summary: View Attendance

Description:

As a student,
I want to view my attendance,
So that I can monitor my academic progress.

Story Points: 2

Story 4 — Faculty Enter Marks

Summary: Faculty Enter Marks

Description:

As a faculty member,
I want to enter student marks,
So that students can view their academic performance.

Story Points: 5

Story 5 — View Results

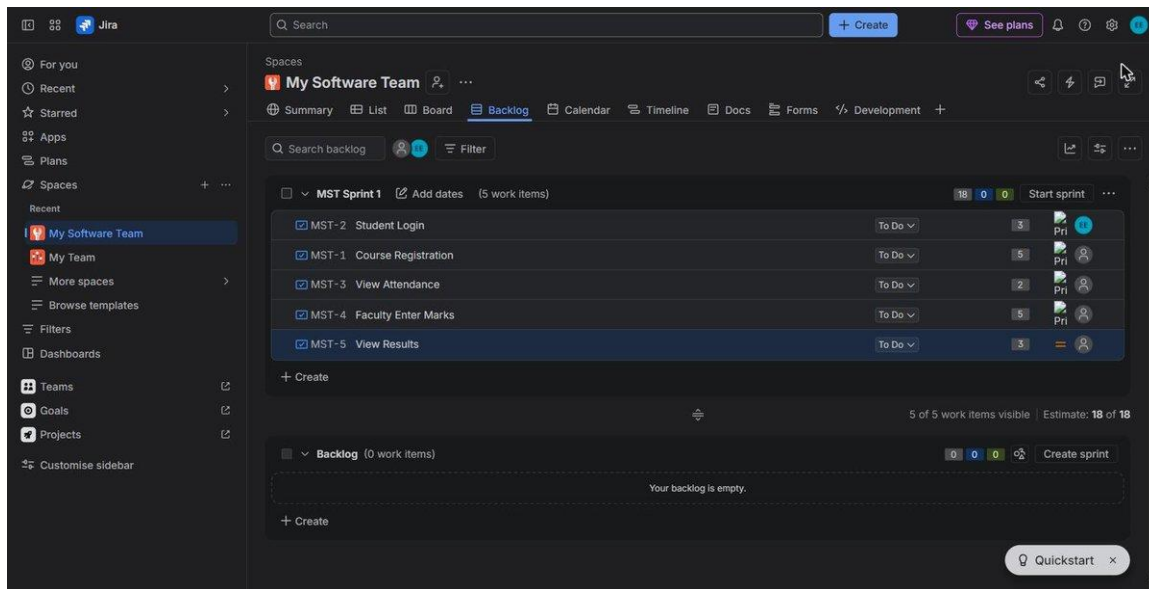

Summary: View Results

Description:

As a student,
I want to view my examination results,
So that I can evaluate my performance.

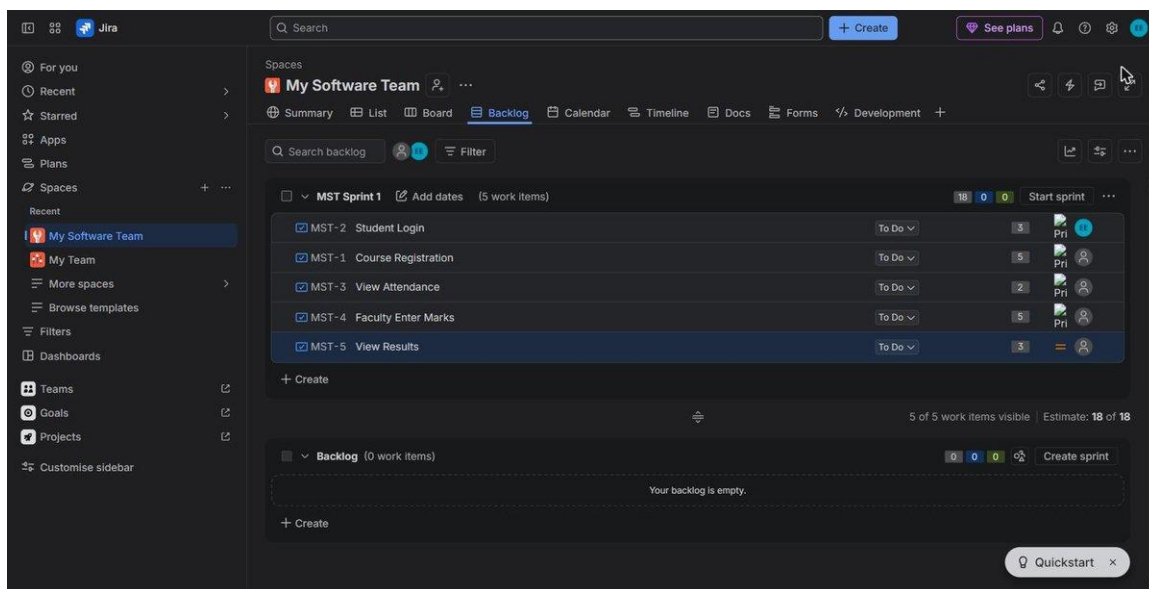

Story Points: 3

All five stories with story points assigned

Step 8: Verify Product Backlog

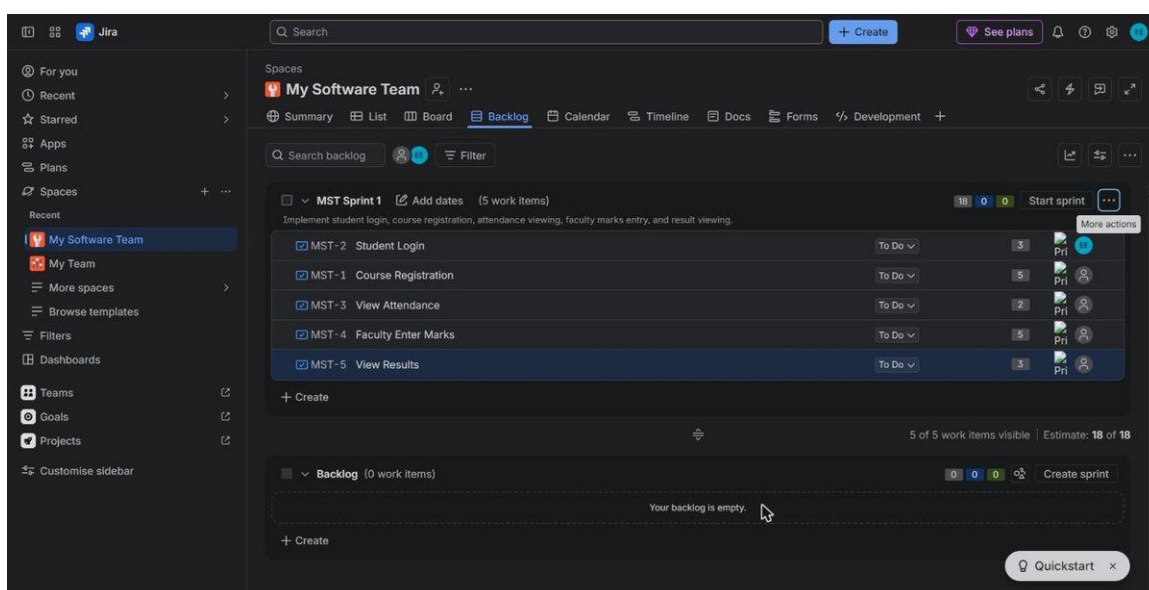

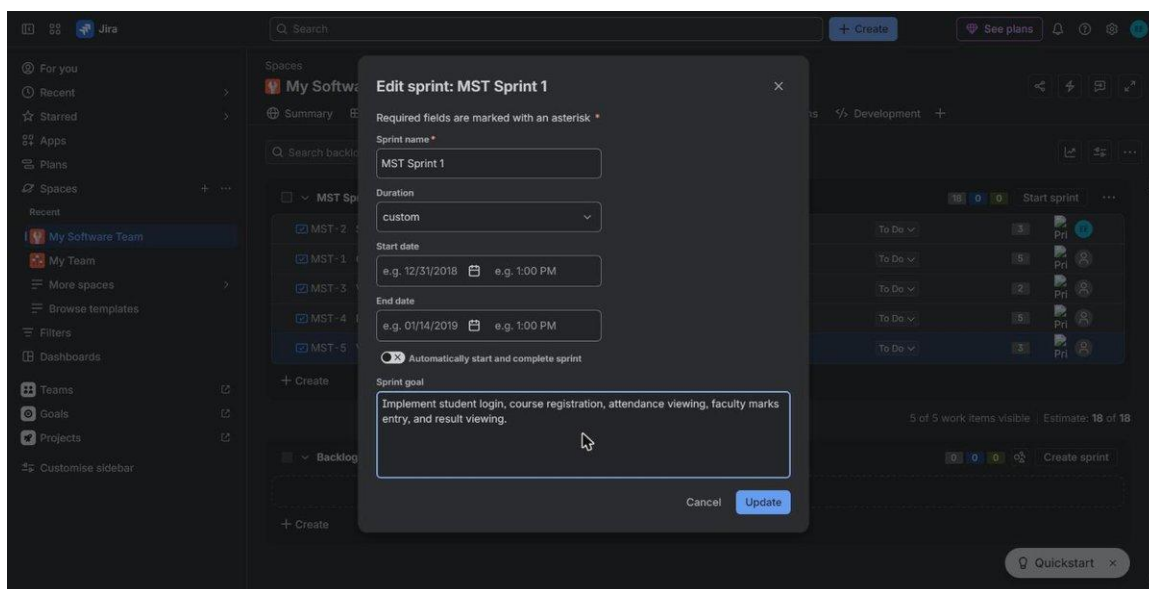

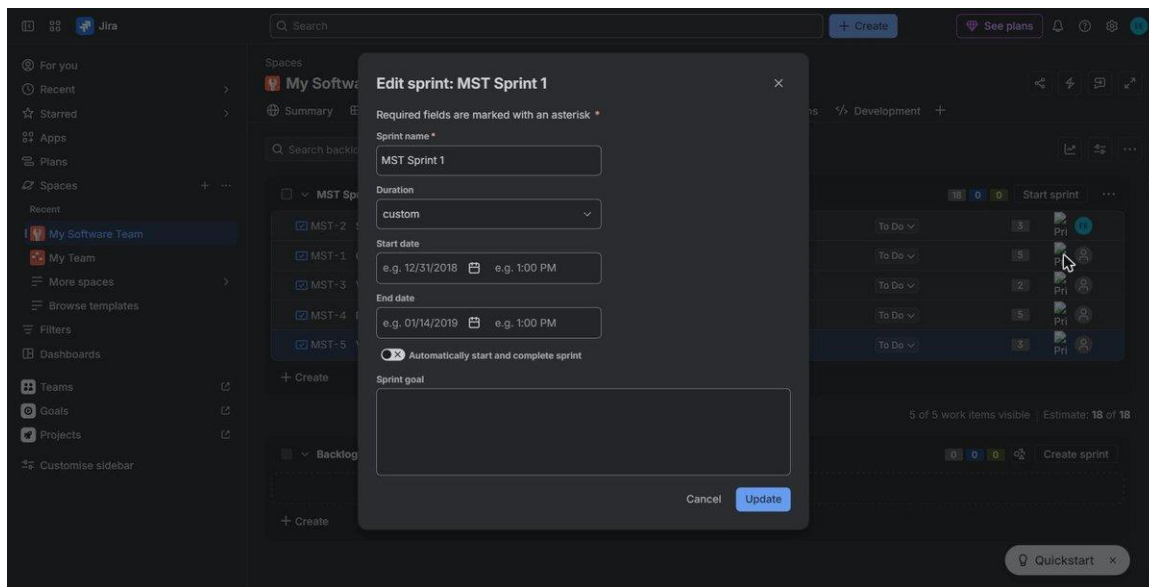

Ensure all five stories appear in the backlog.

Step 9: Create Sprint

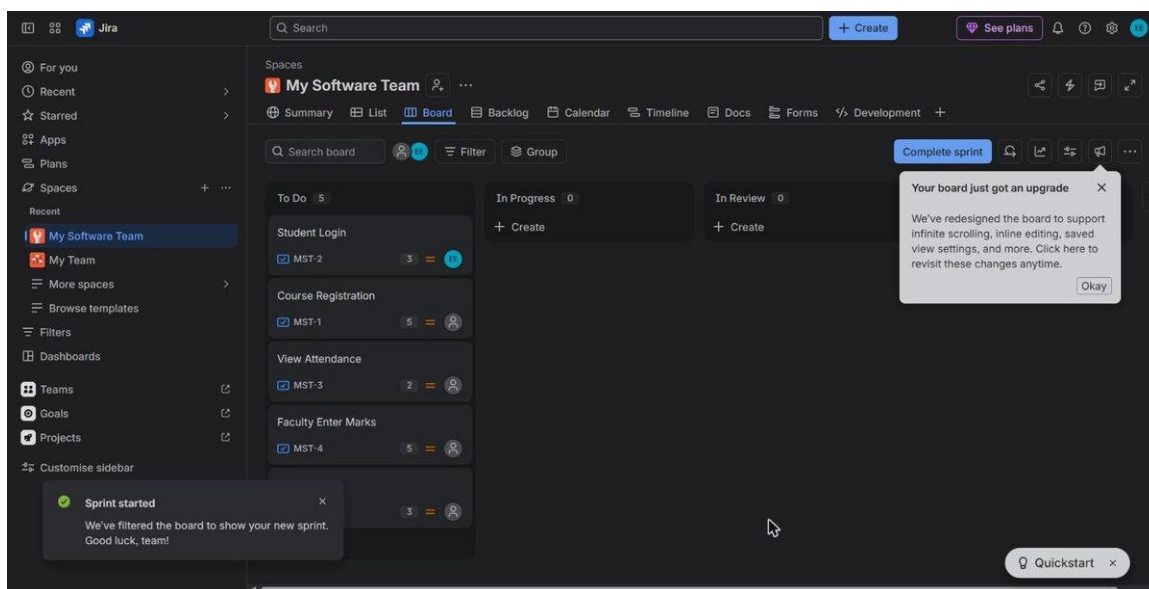

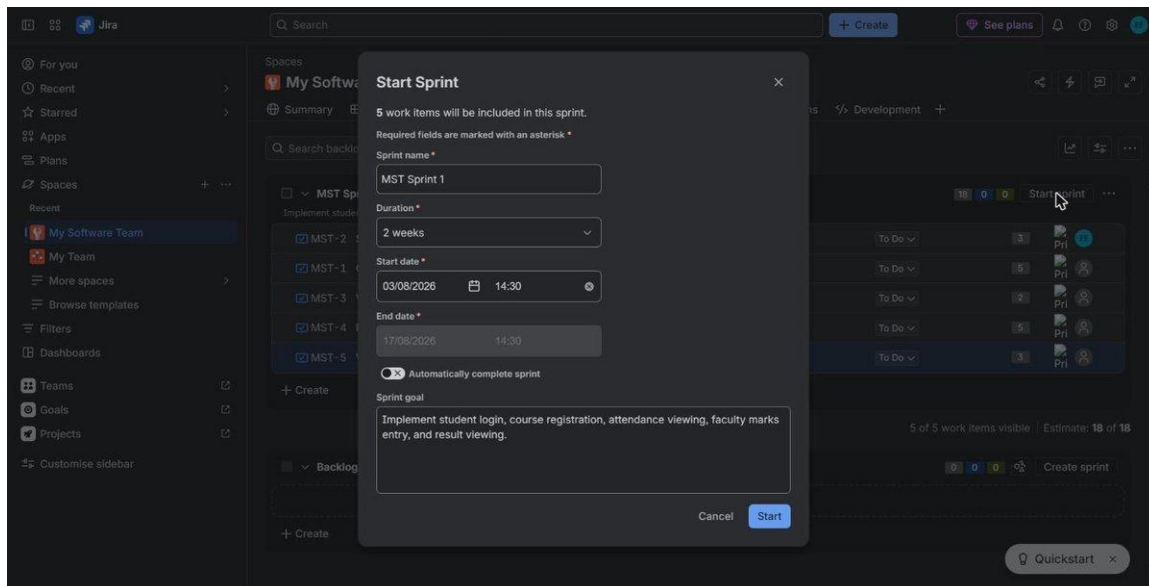

Create SCRUM Sprint 1 and move all stories into the sprint.

Sprint Goal: Implement student login, course registration, attendance viewing, faculty marks entry, and result viewing.

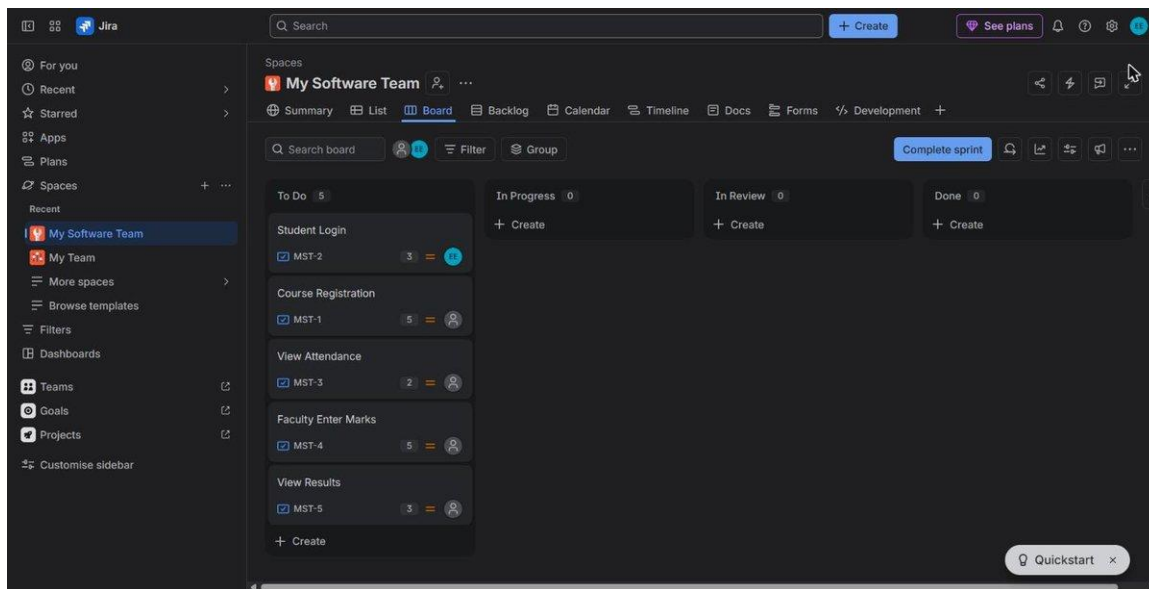

Step 10: Start Sprint

Start Sprint 1 with the default duration.

Step 11: Scrum Board

Verify that all five stories are displayed in the To Do column on the Scrum Board.

Result

Successfully created a Jira Scrum project, defined five user stories, assigned story points, created Sprint 1, and managed the stories using the Scrum Board.
